BLACK CREEK GROUP

Black Creek Diversified Property Fund

New Acquisition — Tri County Distribution Center

SAN ANTONIO, TX

Black Creek Diversified Property Fund (DPF) recently acquired a new Class A Industrial Building totaling 244,800 square feet and 100% leased to two tenants.

PROPERTY SUMMARY

The asset is 100% leased to two tenants:

- Holingsworth Logistics (approximately 200,000 square feet; 82% of the building)
- Scholastic Book Fairs (approximately 44,800 square feet; 18% of the building)

Location	San Antonio, TX
Building Size	244,800 square feet
Acquisition Cost	$20.6 Million
Acquisition Date	02/13/2019
Year Built	1997
Occupancy at Acquisition	100%

MARKET SUMMARY[1]

- The property provides excellent access to I-35 (0.3 miles; 1 minute), a major San Antonio thoroughfare that connects the city with Austin, as well as the East Charles William Anderson loop (4.0 miles; 5 minutes) and I-10 (12.0 miles; 15 minutes), which connects the city with Houston
- The property is located in the Tri-County Business Park in the Guadalupe County submarket, part of the larger Northeast market of San Antonio
- The Guadaloupe County submarket fundamentals continue to put upward pressure on rents
  - The overall San Antonio warehouse vacancy rate is 2.4%[1]
  - There is only 57,000 square feet under construction in the Guadalupe County submarket representing approximately 0.5% of the submarkets supply
  - Year-over-year rent growth for the submarket was an outstanding 24% and has risen 49% over the last four years[1]

Risk Factors

- **Past performance is not a guarantee of future results. Investing in shares of Black Creek Diversified Property Fund (DPF) common stock involves a high degree of risk.**
- Investing in real estate assets entails certain risks, including changes in: the economy, supply and demand, laws, tenant turnover, interest rates (including periods of high interest rates), availability of mortgage funds, operating expenses and cost of insurance. This investment will offer limited liquidity options to investors. There is no guarantee of any return on investment and stockholders may lose the amount they invest. Real estate investment trusts (REITs) are not suitable for all investors.
- An investment in DPF is not a direct investment in commercial real estate, but rather an investment in a REIT that owns commercial real estate.
- Further, investing in DPF stock involves additional and substantial risks specific to DPF, including, among others, that:

i. There is no public trading market for shares of DPF's common stock, and DPF does not expect that there will ever be a public trading market for its shares, so redemption of shares by them will likely be the only way to dispose of your shares.

ii. DPF's redemption program imposes limits on redemptions. DPF may amend, suspend or terminate its share redemption program at any time. As a result, DPF's shares have only limited liquidity and may become illiquid. Beginning in the first quarter of 2009 through the third quarter of 2016, redemption requests for Class E shareholders exceeded the redemption limits set forth in DPF's Class E share redemption program and associated offering materials, which during that time frame was limited to a 5% per year cap and other limitations with respect to Class E shareholders and DPF conducted a number of self-tender offers to supplement this liquidity. As a result, investors who sought to redeem their Class E shares during that period only received a portion of the proceeds they requested, either through the redemption program or self-tender offers that were conducted by DPF, and were required to resubmit redemption requests periodically in order to renew their request to either have their shares tendered or purchased pursuant to a tender offer. During this time period, these Class E shareholders did continue to receive distributions on the shares they retained.

iii. The purchase and redemption price for shares of DPF's common stock will be generally based on the NAV of each class of common stock and will not be based on any public trading market. DPF's NAV will not represent DPF's enterprise value and may not accurately reflect the actual prices at which DPF's assets could be liquidated on any given day, the value a third party would pay for all or substantially all of DPF's shares, or the price that DPF's shares would trade at on a national stock exchange. The board of directors may amend DPF's NAV procedures from time to time.

iv. Some of DPF's executive officers and directors and other key personnel are also officers, directors, managers, key personnel and/or holders of an ownership interest in its advisor, its dealer manager and/or other entities related to its advisor. As a result, they face conflicts of interest, including but not limited to conflicts arising from time constraints, allocation of investment opportunities and the fact that the fees its advisor will receive for services rendered to DPF will be based on DPF's NAV, the procedures for which its advisor will assist its board of directors in developing, overseeing, implementing and coordinating.

v. If DPF fails to maintain its status as a REIT, it would adversely affect its results of operations and its ability to make distributions to its stockholders.

vi. The amount of distributions DPF may make is uncertain, is not guaranteed, may be modified at the program's discretion, and is subject to board approval. DPF may pay distributions from sources other than cash flow from operations including, without limitation, the sale of assets, borrowings or offering proceeds (including the return of principal amounts invested). The use of these sources for distributions would decrease the amount of cash DPF has available for new investments, repayment of debt, share redemptions and other corporate purposes, and could reduce your overall return and dilute the value of your investment in shares of DPF common stock. Our distributions for the years ended December 31, 2018, 2017 and 2016, on an annualized basis, were fully funded from our operations. When looking at individual quarters within those periods, in some cases our distributions were not fully funded from our operations for such quarters. In such cases, the shortfall was funded from borrowings, and ultimately made up with excess cash from operations from other quarters during the same period. Cash flow from operations does not include a reduction to cash flow resulting from on-going capital expenditures as GAAP defines those cash outflows as part of investment activities. Nonetheless, capital expenditures are inherently a significant and material part of the on-going business of DPF. Furthermore, cash flow from operations, after deducting capital expenditures, may not be sufficient to fund 100% of DPF's distribution. For example, cash flow from operations, after deducting capital expenditures, for each of the years ended December 31, 2017 and 2016, would not have been sufficient to fund DPF's entire distribution amounts. Furthermore, due to two recent large lease expirations, DPF may incur higher capital expenditures over the next two years, continuing to make funding distributions through cash flows from operations, after deducting capital expenditures, unlikely over that period of time.

vii. The payment of fees by DPF to its advisor and its dealer manager will reduce the cash available for distribution and will increase the likelihood that investors are unable to recover the amount of their investment in DPF.

viii. In connection with DPF's offering, it incurs fees and expenses. In particular, DPF expects to incur a dealer manager and distribution fee which are expected to reduce the amount of distributions received by certain investors and as a result will lower the overall return to such investors. Also, DPF has and expects to continue to incur organizational and offering related expenses which reduce the overall cash flow of DPF and negatively impact its NAV and could negatively impact your overall return.
